

When PmWiki is called with '?action=diff', it displays a summary of past edits on a page. Each past edit is shown in a box which s

Below each box is a "Restore" link. Clicking the link will open an edit box with the page as it was *before* that edit. You can make

There are two additional options specific to PageHistory:

- **Hide minor edits** - hides any edit that the author marked as 'minor'. - This is done by adding "&minor=n" to "?action=diff".
- **Show changes to output** - It shows changes to the rendered output (as opposed to the normal display which shows chan
- You can set both by using "?action=diff&source=y&minor=y".

In the default mode "Show changes to markup", you can disable word-level highlighting of differences by adding to config.php su

```
\$EnableDiffInline = 0;
```

A page's history is kept for the number of days given by the [\\$DiffKeepDays](#) and [\\$DiffKeepNum](#) variables (set by the site's [wi](#)

Note that a specific page revision isn't removed from the page until the first edit *after* the time specified by [\\$DiffKeepDays](#) has

Is there a way to remove page history from page files?

1. Administrators can clean page histories using the [Cookbook:ExpireDiff](#) recipe.
2. Administrators with FTP file access can download individual pages from the wiki.d directory, open them in a text editor, manually
3. Edit the page. Select *all* the contents of the edit text area and cut them to the clipboard. Enter `delete` into the text area and c

How can I restrict viewing the page history (`?action=diff`) to people with edit permission?

In the *local/config.php* file, set

```
$HandleAuth['diff'] = 'edit';
```

In case of this restriction is set up on a farm, and you want to allow it on a particular wiki, set in your local/config.php :

```
$HandleAuth['diff'] = 'read';
```
