

A search for more than one word will find pages that contain all of the words. Use quotation marks to search for a phrase. Also use quotes for text with punctuation or special characters. Searches are case insensitive.

To limit your search to a single group, enter the group name followed by a slash at the beginning of the search string (e.g., "PmWiki/" or "Site/"). To list all pages, enter a slash for the search.

## Search examples

Enter	To find pages containing
apple pie	both 'apple' and 'pie'
"apple pie"	the phrase 'apple pie'
pmwiki/apple	'apple' in the PmWiki group of pages
"pmwiki/apple"	the phrase 'pmwiki/apple' in all groups of pages
apple -pie	'apple', omitting those containing 'pie'
food -"apple pie"	'food', omitting those containing 'apple pie'
apple "-pie"	the words 'apple' and '-pie'
apple - pie	'apple', '-', and 'pie'
"pie:"	the word 'pie' with a colon
"pie=tasty"	the phrase 'pie=tasty'
name=*crumble*	page names containing 'crumble'

Some *special characters* need to be enclosed in quotes, including the colon (:), equals sign (=), less than (<), single quote (') and double quote(").

For *advanced searches*, [page list](#) parameters (count, name, group, fmt, link, list, order, and trail) can be entered together with the search string.

*Wild card characters*: asterisk (\*) represent zero or more characters and question mark (?) represent exactly one character.
